

Jack. 

Take a minute and look over the journal tasks completed so far (p. 9, 17, 18, 19, 20). Please have a conversation with your parent(s) about your process and understanding of math concepts.

Think about the following:

- What am I doing well?
- What is a goal I have for myself in math?
- Looking at the rubric, how can I align myself with a 3?
- What parts of the task are hardest for me? Easiest for me?
- Am I checking my work?

Please write comments below:

Parent Comments:

JACK AND I REVIEWED all of his work, making some corrections and went over why some of his answers were incorrect. JACK recognizes that he needs to take his time, work on his fluency in basics (multiplication) and completely answer all questions.

Noel 

Student Comments:

Some goals that I would like to set for myself are, going back and checking my work and rereading the questions. The most challenging part when I do a task is writing the explanation and going slowly.

Portfolio Reflection

In looking at your work, what are you most proud of? Why?

Looking back at my work, I am most proud of how I improved a lot in (math) I am most proud of that because at the beginning of the year I didn't like math, but now I do, and I got better. I am also proud of my work in science because I understand the material very well.

In looking at your work, what do you think you can improve upon for the upcoming trimester? What is your plan to achieve this?

Next trimester I would like to improve upon my speed in reading. I would also like to sharpen my skills in writing. To achieve those, I will read more to improve my speed in reading. To improve my writing, I will try to use different words in my writing.

What is something that you hope to achieve/understand by the end of the school year?

By the end of the year I would hope to understand angles completely.

Jack T.

Portfolio Reflection

In looking at your work, what are you most proud of? Why?

I am most proud of my work in reading and the last reading assessment that we took. I am also proud of my spelling tests because I usually get 100s on them.

In looking at your work, what do you think you can improve upon for the upcoming trimester? What is your plan to achieve this?

I want to improve upon word problems in math. My plan to get better at word problems is to underline or circle important facts in the problem, going back and checking my work to see if it's reasonable. I will also take my time. Great plan!

What is something that you hope to achieve/understand by the end of the school year?

Something that I hope to understand by the end of the year is converting fractions to decimals, and multiplying and dividing fractions.
